

GLOW-IN-THE-DARK SOLAR SYSTEM MOBILE MAKING KIT

SAFETY MESSAGES

1. Please read through this instructions before you start.
2. Adults assistance and supervision recommended.
3. This kit contains small parts which may cause suffocation if misused. Not intended for children below 36 months.

CONTENTS

- 1 complete set of Solar System planets
- 1 squeeze-to-draw glow paint
- 1 set stencils for applying glow paint
- 1 set of hanging structure including joints, rods and thread
- 1 bonus wall chart with fun facts of Solar System (description in English only)
- 1 detailed assembly and painting instruction with Kidz Quiz™ (8 sets of questions and answers)

INSTRUCTIONS

GLOW PAINTING:

1. Cover the planet paper boards with the corresponding stencils.
2. Apply glow paint onto the exposed area of the paper boards.
3. Remove the stencils and leave the paint to dry. (It takes about 1-2 hours for the paint to dry in room temperature. The thicker the paint you apply, the longer the time required for drying.)
4. After the paint on the front surface is dried completely, repeat the above steps for the reverse side of the paper boards.

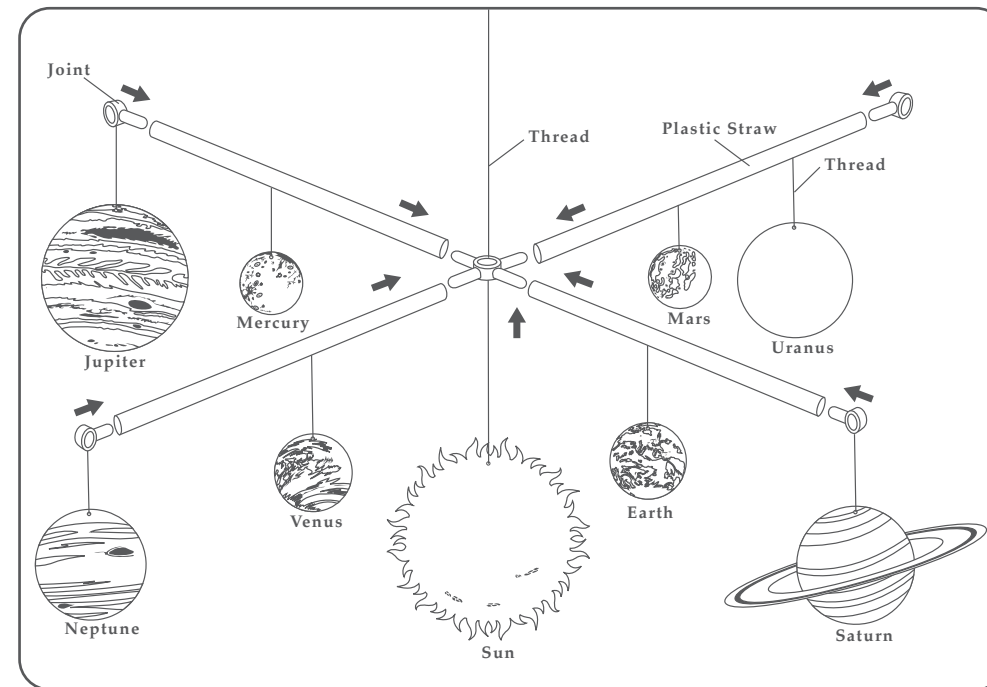

PAINTING HINTS:

The glow paint is semi transparent. If you would like to make your Solar System glow brighter, apply more layers of paint. However, at the same time it will cover up some graphic details of the paper boards too.

HANGING THE MOBILE:

1. After the glow paints are dried, pop out the paper boards.
2. Tie one end of the thread to the hole of the paper boards and the other end to the hanging structure.
3. Refer to the attached diagram for hanging and balancing structure assembly. (However, please be reminded that sizes and balance positions as in this mobile do not have any relation to the real Solar System. The paper board sizes and positionings are just for balancing. Please refer to the wall chart for actual Solar System facts)

ASSEMBLY INSTRUCTIONS

HOW TO MAKE IT GLOW?

Hang it on ceiling. Expose it to room light or torch light for a minute. Turn off the light and watch it glows like magic! Recharge it as necessary and it will glow again and again. This glow-in-the-dark fun is as unlimited as your imagination.

KIDZQUIZ™

Collect Kid Quiz from all the KidzLabs Kits.

Challenge your friends or family with this super Kidz Quiz. It's fun!!

QUESTIONS:

1. What is the length of a year in Saturn?
2. What is the length of a day in Venus?
3. Which planets lies between the Earth and the Sun?
4. Which planet is also called the "the Earth's Twin" because of their size similarity?
5. Which planet is also known as the red planet?
6. Which are the ringed planets in the Solar System?
7. Which planet has the highest number of moons?
8. Which is the most beautiful planet to live?

ANSWERS TO KIDZ QUIZ™

1. 29.5 Earth years
2. 243 Earth days
3. Mercury and Venus
4. Venus
5. Mars
6. Saturn, Uranus and Neptune
7. Saturn, more than 18
8. The Earth. No doubt!
